

MAJJI DURGA RAO

Full Stack Engineer • React.js • Node.js • TypeScript

Hyderabad, Telangana • 8817666164 • sde10durga@gmail.com • github.com/Durga00110 • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of hands-on experience building end-to-end web applications across React.js, Node.js, TypeScript, and MongoDB/PostgreSQL/MSSQL. Delivered production-grade features on a platform serving billions of users in the insurance domain, reducing API latency by 50% and improving frontend load time by 30%. Equally comfortable owning UI architecture — micro frontends, accessible design systems, Redux state management — and backend services, including RESTful/GraphQL APIs, data abstraction layers, and document management systems. Experienced in Agile/Scrum teams, CI/CD pipelines, TDD with Jest, and cross-functional collaboration across BFSI, E-Commerce, and Government domains.

TECHNICAL SKILLS

Frontend	React.js (Advanced), TypeScript, JavaScript (ES6+), Next.js / SSR, HTML5, CSS3, Redux, Redux Toolkit, React Query
Backend	Node.js, Express.js, RESTful APIs, GraphQL, JWT, Data Abstraction Layer (DAL)
Databases	MongoDB, PostgreSQL, MSSQL, MongoDB GridFS
UI / Design	Material UI (MUI), Bootstrap, Storybook, WCAG 2.1 AA / ARIA, Responsive design
Testing	Jest, Mocha, React Testing Library, TDD, near-100% code coverage
Mobile	React Native — cross-platform iOS & Android
Build / CI-CD	Webpack, Vite, NX Console, CI/CD Pipelines, Docker basics, Git / GitHub
Cloud / Tools	AWS, Datadog, Postman, Jira, Agile / Scrum, Micro Frontends
AI / Emerging	RAG pipeline integration, Ollama, AI agent UI, Context engineering

PROFESSIONAL EXPERIENCE

Software Development Engineer | **HTC Global Services** | Hyderabad, Telangana

Jan 2024 – Present • Project: AMFAM Insurance Platform | Team: 4 engineers

- Built and owned full-stack features for a platform serving billions of users, spanning React.js frontend, Node.js backend services, and RESTful API integration across enterprise insurance workflows.
- Designed and implemented a Node.js Data Abstraction Layer (DAL) that decoupled microservices and reduced average API response latency by 50%, improving reliability and maintainability across the backend.
- Improved frontend load time by 30% through code splitting, lazy loading, and component memoisation — directly impacting user experience at scale.
- Acted as SME for the Third-Party Interest (TPI) module, owning end-to-end architecture decisions for external stakeholder management and claim-handling workflows.
- Led unit testing across 100+ React.js components with Jest and React Testing Library, achieving near-100% coverage; enforced TypeScript strict mode and Redux best practices for a team of 4.
- Architected a reusable, accessible UI component library in Material UI (MUI) following WCAG 2.1 AA and ARIA standards, serving all platform surfaces.
- Owned production bug triage, root-cause analysis, and on-call incident resolution for mission-critical workflows; contributed to team documentation and onboarding standards.

Programmer Analyst | **Bodex LLC** | Bhilai, Chhattisgarh

Oct 2022 – Dec 2023 • Project: The Blind Man — Next Gen Sales Platform

- Developed a full-stack cross-platform sales application end-to-end using the MERN stack (MongoDB, Express.js, React.js, Node.js) and MSSQL, with a React Native mobile layer for field sales teams.
- Designed and built RESTful APIs and database schemas from scratch, integrating frontend components with backend data models to deliver consistent UX across desktop and mobile.
- Built a Document Management System (DMS) that improved application scalability by 60%, enabling secure, role-based document handling and workflow automation for sensitive sales data.
- Integrated a RAG-based AI chatbot using Ollama to enhance self-service capability, reducing manual support overhead for end users.
- Optimised full-stack performance via query tuning, API response caching, code splitting, and lazy loading; maintained technical documentation and contributed to engineering standards.

Software Development Intern | Centinel Spark Technologies Pvt. Ltd. | Hyderabad

Jan 2021 – Jan 2022 • Project: TSWRSEIS Government Platform

- Built and deployed a responsive government education platform (HTML5, CSS3, JavaScript, Node.js), collaborating with stakeholders to deliver production-ready features and improve digital adoption.

KEY PROJECTS

- Secure Authentication System: Full-stack Node.js + JWT implementation with login, registration, and RBAC — follows OWASP secure coding standards.
- Scalable File Upload Service: MongoDB GridFS + Express.js + Multer pipeline for large-file handling across desktop and mobile; supports resumable uploads and MIME-type validation.
- Full-Stack CRUD Application: React.js SPA + Node.js REST API + MongoDB with paginated data fetching, optimistic UI updates, and clean separation of concerns.

EDUCATION

Bachelor of Engineering — Computer Science | Chhattisgarh Swami Vivekanand Technical University, Bilai | May 2019

CERTIFICATIONS & ACHIEVEMENTS

- Atlassian Agile Project Management Professional Certificate
- Scrum: The Basics | Agile Foundations | Git Essential Training
- Programming Foundations: Secure Coding | Context Engineering Certification (Generative AI)
- Full Stack Web Development Internship — Best Performer Award
