

MAJJI DURGA RAO

Senior Frontend Engineer • React.js • TypeScript • Node.js

Hyderabad, Telangana • 8817666164 • sde10durga@gmail.com • github.com/Durga00110 • [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years delivering scalable, high-performance web applications serving billions of users across BFSI, E-Commerce, and Government domains. Expert in React.js, TypeScript, and Node.js with a track record of measurable impact: 50% API latency reduction via custom DAL architecture, 30% frontend load-time improvement through code-splitting and lazy loading, and 60% scalability improvement via a Document Management System. Owned large-scale features end-to-end, led unit testing coverage to near 100% across 100+ components, and mentored engineers in a cross-functional Agile/Scrum team of 4. Specialises in micro frontend architecture, WCAG 2.1 AA accessible design systems, Redux state management, and production-grade CI/CD pipelines.

TECHNICAL SKILLS

Core	React.js (Advanced), TypeScript, JavaScript (ES6+), Next.js / SSR, Node.js, HTML5, CSS3
State / API	Redux, Redux Toolkit, React Query, RESTful APIs, GraphQL, JWT
UI / Design	Material UI (MUI), Storybook, Bootstrap, WCAG 2.1 AA / ARIA, Responsive design, Design systems
Testing	Jest, Mocha, React Testing Library, TDD, near-100% code coverage
Build / CI-CD	Webpack, Vite, NX Console, CI/CD Pipelines, Docker basics, Git / GitHub
Cloud / Observability	AWS, Datadog, Postman
Databases	MongoDB, PostgreSQL, MSSQL
Methods / Tools	Micro Frontends, React Native, Agile / Scrum, Code reviews, Jira

PROFESSIONAL EXPERIENCE

Senior Software Development Engineer | **HTC Global Services** | Hyderabad, Telangana

Jan 2024 – Present • Project: AMFAM Insurance Platform | Team: 4 engineers

- Acted as Subject Matter Expert (SME) for the Third-Party Interest (TPI) module on a platform serving billions of users, owning architecture decisions for managing external stakeholders and claim-handling workflows across the enterprise.
- Improved frontend load time by 30% through code splitting, lazy loading, and component memoisation — directly impacting user experience across desktop and mobile for a billion-dollar insurance platform.
- Led unit testing initiative across 100+ React.js components with Jest and React Testing Library, achieving near-100% code coverage; enforced TypeScript strict mode and Redux best practices for a team of 4 engineers.
- Architected a reusable, accessible UI component library in Material UI (MUI), fully compliant with WCAG 2.1 AA and ARIA standards, adopted across all platform surfaces.
- Designed a Node.js Data Abstraction Layer (DAL) that decoupled backend services and reduced average API latency by 50%, improving system resilience and maintainability.
- Owned the 'Relate' CMS tool for scalable routing management; led production bug triage, root-cause analysis, and on-call incident resolution for mission-critical insurance workflows.
- Mentored junior engineers through structured code reviews; championed TypeScript best practices and contributed to team engineering documentation and onboarding standards.

Programmer Analyst | **Bodex LLC** | Bhilai, Chhattisgarh

Oct 2022 – Dec 2023 • Project: The Blind Man — Next Gen Sales Platform

- Built a full-stack cross-platform sales application using the MERN stack (MongoDB, Express.js, React.js, Node.js), MSSQL, and React Native, delivering seamless desktop and mobile accessibility for field sales teams.
- Built a Document Management System (DMS) that improved application scalability by 60%, enabling secure, role-based document handling for sensitive sales data.
- Designed and integrated RESTful APIs with a reusable component architecture, ensuring consistent UX across all platforms with zero regression on core workflows.
- Implemented a RAG-based AI chatbot UI using Ollama with context-aware AI agent integration, reducing end-user support queries through improved self-service capability.
- Optimised application architecture via code splitting, lazy loading, and memoisation; maintained technical documentation and contributed to code review standards.

Software Development Intern | **Centinel Spark Technologies Pvt. Ltd.** | Hyderabad

Jan 2021 – Jan 2022 • Project: TSWRSEIS Government Platform

- Built and deployed a responsive government education platform (HTML5, CSS3, JavaScript), improving digital adoption; collaborated with stakeholders to deliver accessible, production-ready UI features.

KEY PROJECTS

- Secure Authentication System: Node.js + JWT with login, registration, and RBAC following OWASP secure coding standards.
- Scalable File Upload Service: MongoDB GridFS + Multer pipeline for large-file handling across desktop and mobile; supports resumable uploads and MIME-type validation.
- Full-Stack CRUD Application: React.js SPA + Node.js REST API + MongoDB with paginated data fetching and optimistic UI updates.

EDUCATION

Bachelor of Engineering — Computer Science | Chhattisgarh Swami Vivekanand Technical University, Bhilai | May 2019

CERTIFICATIONS & ACHIEVEMENTS

- Atlassian Agile Project Management Professional Certificate
- Scrum: The Basics | Agile Foundations | Git Essential Training
- Programming Foundations: Secure Coding | Context Engineering Certification (Generative AI)
- Full Stack Web Development Internship — Best Performer Award
