

Majji Durga Rao

Gowlidoddy, Hyderabad, Telangana • 8817666164 • sde10durga@gmail.com • <https://github.com/Durga00110>

Full Stack Developer with 5+ years of experience building scalable applications using **React, Express, TypeScript, and Node.js**. Expert in **micro frontend architecture, system design, and performance optimization**, delivering high-quality solutions across **BFSI, E-Commerce, and Government domains**.

Experience

2024– PRESENT

Software Developer Engineer | HTC Global Services | Hyderabad, Telangana | AMFAM

- Served as **SME for Third-Party Interest (TPI)**, owning full-stack development across React and Node.js — including RESTful API design, data modeling, and insurance claim workflow integration for accurate stakeholder and lienholder management.
- Architected **Redux Toolkit** state management with TypeScript (slices, thunks, selectors), standardizing async data flows; led unit/integration testing across **100+ components** using Jest and React Testing Library, achieving near **100% test coverage**.
- Built a **WCAG 2.1-compliant MUI component library** with 40+ reusable, Storybook-documented components — boosting development efficiency by **30%** and enforcing consistent UX across web and mobile platforms.
- Designed **Node.js REST APIs** with Express.js using a service-repository pattern, decoupling business logic from DynamoDB queries; improved API response times by **50%** via query optimization and caching, with active bug triage and on-call support.

OCT 2022 – AUGUST 2024

Programmer Analyst | Bodex LLC | Bhilai, Chhattisgarh | The Blind Man Next Gen Sales App

- Built a scalable **MERN stack + React Native** sales platform — developed RESTful APIs with Express.js for lead management, order processing, and sales analytics, with an intuitive React UI and seamless cross-platform data sync via React Native and MSSQL.
- Architected a **Document Management System (DMS)** — engineered secure REST APIs for uploading, retrieval, versioning, and access control with a React frontend — improving scalability by **60%** and enabling structured, secure document handling.
- Developed a **RAG-based AI chatbot** — integrated retrieval pipeline with LLM backend APIs and built a conversational React UI — delivering context-aware responses and significantly enhanced user experience.

FEB 2022 – AUG 2022

Full stack Engineer | Edureka Internship | Remote | Bhilai, Chhattisgarh

- Built and deployed a **full-stack MERN application** from scratch — developed RESTful APIs with Node.js, Express.js, and MongoDB, designed responsive React.js interfaces with reusable component architecture, and built **Zomato & Netflix clones** to solidify understanding of full-stack workflows, API design, and database querying.
- Managed the complete **project lifecycle independently** — from requirement gathering, system design, and database modeling to development, testing, and deployment — recognized as **Best Performer** for code quality, delivery speed, and technical depth in MERN stack development.

JAN 2021 – JAN 2022

Intern | Centinel Spark Technologies Pvt. Ltd. | Hyderabad, Telangana | TSWRSEIS

- Built and deployed a responsive web platform using **HTML, CSS, and JavaScript**, designed intuitive UI with interactive features, and mentored students in **web development and robotics**, improving operational efficiency and digital adoption.

Skills

HTML5, CSS3, JavaScript, TypeScript, React, React Native, Redux, Hooks, Node.js, Express, MongoDB, GraphQL, PostgreSQL, Monolithic & Microservices Architecture, REST API Design, Jest, Micro Frontend, Material UI, Bootstrap, Accessibility Testing, Version Control, GitLab, CI/CD, Git, NX Console, GitLab, Atlassian Jira, Datadog, Postman, CMS, Relate, Optimizely, Reactive Programming, Chrome DevTools, Android Studio, Xcode, React Native CLI, Expo, AWS, RAG, Ollama, AI Agents, Chatbots, NoSQL, JWT, Storybooks, Lighthouse, Vite, NextJS, React advance Patterns, System design, SOLID Principles, Performance optimization, Docker, Flipper.

Education

MAY 2019

Bachelor of Engineering | Chhattisgarh Swami Vivekanand Technical University | Bhilai, Chhattisgarh
Electronics & Telecommunication Engineering ~ 6.8 GPA

Projects / Interest

Secure Authentication System

- Implemented authentication and role-based access control using JWT and Node.js.

Scalable File Upload System

- Built file upload system using MongoDB GridFS and Multer for handling large-scale data efficiently.

AI Chatbot with RAG Architecture

- Built a React.js and TypeScript-based chatbot integrating Retrieval-Augmented Generation (RAG) with LLM APIs (Ollama), enabling context-aware responses through vector-based document retrieval and optimized real-time UI interactions.
- Engineered the RAG pipeline using Python, Lang-Chain, and Ollama integrations, leveraging vector embeddings, document chunking, and retrieval workflows in Google Collab for rapid experimentation, LLM performance tuning, and efficient end-to-end AI prototyping.

Certifications and Achievements

- Atlassian Agile Project Management Professional Certificate
- Programming Foundations: Secure Coding
- Context Engineering Certification. (Generative AI)
- Full Stack Web Development Internship Program - Best performer
- Agile Foundations
- Git Essential Training
- Scrum: The Basics
